
Miles Wiley Named Law360 2026 Rising Star

Date: 08/03/26

Law360 has named Cahill partner Miles Wiley a 2026 Banking Rising Star.

Miles represents traditional and digital asset financial institutions and large corporations in high-profile litigation and appellate matters, and advises clients in enforcement and regulatory proceedings before government agencies. His recognition reflects a run of precedent-setting wins for leading global financial institutions, including a Second Circuit appellate victory on a novel anti-terrorism finance liability theory that courts have since relied on in subsequent high-stakes matters, a rare jury trial win in a multibillion-dollar antitrust class action against a global bank, a dismissal of a substantial claim against a global bank in a ruling that broke new ground under foreign law, a significant FINRA arbitration decision on behalf of a global financial institution, and resolution of high-stakes regulatory enforcement matters.

Law360's Rising Stars series recognizes outstanding lawyers whose exceptional achievements have distinguished them early in their careers across a broad range of transactional and disputes practice areas.
