This FCPA Flash episode from *The FCPA Professor* is a conversation with Cahill partner, Brad Bondi. Brad Bondi recently testified at a House hearing titled “Ensuring Effectiveness, Fairness, and Transparency in Securities Law Enforcement” that touched upon several FCPA relevant issues. In the podcast, Bondi elaborates on certain of these issues including: disgorgement and statute of limitation issues. In addition, based on his comment during the hearing that “few would consider a local police force successful in deterring crime if it announced record numbers of arrests year after year,” Bondi opines whether the FCPA is being successful in accomplishing its objectives.
